

Antero™

Maintenance Information Solutions

Shift from Corrective to Preventive Maintenance!

Measurable Savings!

AllMax software provides the tools that will allow you to spend less time entering, collecting and manipulating data and more time on other important matters, like running your plant.

Antero can provide critical information so you are aware of situations before they become expensive, more complex problems. When an immediate decision is needed to “repair or replace”, Antero puts the necessary information at your fingertips so you can make confident, knowledge-based decisions.

- **Extend equipment life**
- **Reduce and track downtime**
- **Reduce wasted time and labor costs**
- **Accomplish more with minimal budget**

Solid Solutions

- **Manage inventory and allocation of resources**
- **Produce status reports and documents summarizing maintenance activities**

But, what really sets us apart from any other software is our affordability, personal attention, and unparalleled service after the sale.

Expect more.

Our Customers Say It Best...

“Antero gives us the ability to manage assets, labor, work orders and maintenance schedules. In fact, Antero can help ensure proper pump maintenance, extending the life of a pump from three to four years to 12 years or more.”

*~ Chris Melvin, Pretreatment Coordinator
City of Piqua WWTP, OH*

“Antero maintenance software? I love it. The guys love it, especially when the regulatory commission makes a visit and we can put the data in their hands on the spot. Antero makes life a whole lot easier.”

*~ Tim Chapman, Elk Valley Public Service District
Elkview, WV*

Need More Reasons to Choose Antero?

Work order scheduling, real-time data collection, historical data, cost and custom reporting—just a glimpse of the extensive capabilities of Antero. It couldn't be easier.

- **Manage Assets** – Track parts, equipment, materials, tools and consumables; automatically generate parts and material reorder reports, purchase orders or requisitions.
- **Meters and Gauges** – Input readings relevant to equipment usage and maintenance schedules.
- **Work Order Builder** – Create and save equipment and task combinations that will be used to generate scheduled work.
- **Work Order Request** – Send work order requests to the Antero program from any connected computer.
- **Reports** – A broad range of reports are included, all designed to assure compliance and give you a clear picture of the various elements of your maintenance program. Custom reports are also available.
- **Security and Utilities** – Antero user permissions and Windows® log-in security, along with a backup utility to protect your data integrity.
- **MS SQL Database Engine** – Antero is packaged with MS SQL Express.

Setup and Installation

For inquiries regarding an Antero setup, you will need to contact AllMax Software. A representative will be able to tell you what information we will need for proper setup, set a time frame for completion of the setup, and discuss whether the setup should be completed onsite or from the AllMax office. Installation services are also available.

Add-On Options

OPC Interface

Collects data from outside sources such as SCADA, gauges or meters.

Let our technical support team help you explore how Antero can solve your most challenging maintenance information issues.

Contact us today for a demonstration and to find out how you can get a FREE, full-version trial copy of Antero software!
